

## Archetypes Workshop

### Level I

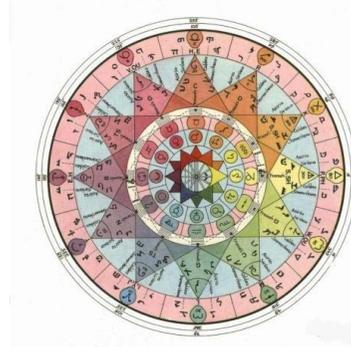

*I wish from the core of my heart that all those who want to "LEARN or JUST REMEMBER" this healing technique are aware of the great help that this represents both for ourselves and to help others.*

*And you MUST KNOW that this is not just another technique or learning, but what will allow us to detect and to know that the being is alone, without dense energies inside or in his environment.*

*This has to be appreciated, because the aid is immense, as it is not just giving us the information, but also allowing us to participate in this cleansing and healing process .*

May Peace and Love accompany you in all your day to day activities, and it is my wish that this spiritual tool remains "integrated" for your progress and welfare, within yourselves and in helping others.

# ARCHETYPES WORKSHOP (LEVEL I)

## PRESENTATION

During the workshop we will study the **Archetypes** as an energetic or spiritual healing therapy. When we say spiritual we mean what is not confined to the world of matter. By Spiritual Healing we refer to the world of subtle energies, invisible to the physical eye. The Spiritual Healing allows us to rediscover the well-being with oneself in all aspects of the person (physical, emotional, mental, spiritual and karmic).

The **Archetypes** are the elements that make up our design as human beings and could be defined as the Essence, the energetic shape of something original and perfect. They are part of the sacred geometry. It is an energy condensed in forms and its perception in Healing allows us to quickly diagnose, reconstruct and harmonize any form that is damaged or weak.

One of the most therapeutic actions is to release childhood, birth, pregnancy or past lives traumas that are causing an energy blockage in the karma archetype and slows down the development of the individual, producing adverse effects such as fears, uncertainties, depressive tendencies and nervous and physical problems.

## PROGRAM

- Introduction
- Types of Archetypes
- The seven etheric bodies
- Causal body Archetype
- Anchor Point Archetype
- Assembly Point Archetype
- Arquetype of the Soul
- The Spiritual Essences
- Chakras Archetype (over a distance)
- Higher Chakras
- Karma Archetype
- Disincarnated Souls Archetype
- Archetype to clean locations
- Cosmic Egg Archetype

Everything in nature, composed of body, mind and spirit, has its original and perfect archetypal forms.

The Healer can, from the personality of the soul-heart, and with the help of the hands, detect and modify the incorrect archetypal forms that produce vibrational blockages.

Through this therapy any illness can be healed if it is not karmic.

With the **Archetypes** we can help the souls who have not yet found their way.

It can be regarded as the sacred healing for the physical and etheric beings.

To know and work these archetypal forms is an initiation and opening of consciousness.

The **Archetypes** healing is an act of unconditional love.
